

Position Vacant Scientist II (R&D)

AcruX is a dynamic and successful ASX listed Australian pharmaceutical company developing and commercialising a range of patient preferred and generic products for the global market. Seeking strong team players, AcruX is seeking a Scientist who will support the company's development programs in a timely and effective manner.

The **Scientist II (R&D)** key duties will include developing and characterising formulations for AcruX's specialty and generic portfolio. The successful candidate will have responsibilities in the following key areas:

- Develop and characterise formulations for AcruX's specialty and generic portfolio to support an ANDA and NDA US FDA regulatory dossier filing
- Perform scale-up studies and manufacture laboratory scale pharmaceutical products to support stability programs
- Generate data to support patent filings
- Conduct experiments to evaluate the feasibility of product concepts

The ideal candidate will possess a relevant degree with experience in formulation development with demonstrated logical approach to research and development. You will possess a strong technical/scientific understanding of product development and have the ability to research and interpret literature.

The successful candidate will possess excellent communication skills and practical abilities. Strong organisational skills and attention to detail whilst able to multi-task and prioritise. The key to this role will be your flexible "can do" attitude, excellent work ethic and initiative whilst working autonomously or as part of a team.

AcruX offers a dynamic environment that fosters a work culture emphasising teamwork with a commitment to attract and retain highly motivated and qualified people. The working environment at AcruX is one that embodies our vision and values, celebrates diversity of background and thought, and supports a balance of professional and personal needs.
