

SCIENTIST – FORMULATION PERMANENT, FULL TIME ROLE

Acrux wishes to appoint an enthusiastic and committed Scientist who will develop topical formulations to support the development of speciality and generic products to meet the business objectives through obtaining and interpreting data, designing and undertaking experiments and the preparation of documentation.

As a strong team player, reporting to the Formulation Manager, the ideal candidate will have a relevant tertiary qualification with at least two years working in formulation development and a solid understanding of experimental design and proven ability to problem solve.

Ideally you have product development experience in a relevant industry working successfully in a project team with a commercial focus along with analytical (including HPLC) and process optimisation experience. Topical/semi-solid formulation development experience will be highly regarded as will your ability to interpret scientific literature. Experience working in a quality system environment is also desirable.
